19. Eternal Regret?

Exposed shoulders, sexy ankles, muscular backs and miles of tanned flesh will soon grace streets and patios everywhere.

Suddenly the tattoo you had inked a few years ago doesn't seem like such a great idea anymore, does it?

The Director of Skin Laser and Surgery Specialists of New York and New Jersey, Dr. Goldberg can fully remove tattoos via laser surgery. A huge bonus: lasers leave virtually no scarring and recovery time is minimal. The procedure is so gentle on the skin that the area can even be re-tattooed afterwards.

Using multiple lasers of different colors, the lasers break up the tattoo pigment into small pieces which the body can then naturally remove. There is no sensation loss with the procedure and sessions can range in price anywhere from \$300.00 to \$800.00. So much for lasting impressions.

For guidelines on safe tattoo removal or for further information call the Skin Laser & Surgery Specialists of NY and NJ at 800.718.5504.
