WESTFIELD, NJ — Skin Laser & Surgery Specialists of NY and NJ's new Westfield office is now taking appointments for its advanced dermatology services, Mohs surgery and laser treatments. SLSS is led by world-renowned board-certified dermatologist Dr. David J. Goldberg.

“Dr. Goldberg is recognized nationally and internationally for his innovative work with skin lasers, cosmetic dermatology and facial rejuvenation techniques. Dr. Goldberg has been in practice since 1985 and has treated patients and taught doctors throughout the world in the use of these cutting-edge technologies,” said Sasha Hlavinka, marketing coordinator.

“As a growing practice, Skin Laser & Surgery Specialists of NY and NJ expanded to Westfield, New Jersey, in order to offer our services to Westfield and the surrounding towns. We believe that community involvement is key and feel that because Westfield is extremely community-oriented, SLSS is a perfect fit.”

The office provides a vast array of medical dermatology treatments for issues including acne, eczema, hair loss, athlete's foot, vein treatments, dermatitis, moles, nail fungus, keloids, psoriasis, rosacea and skin cancer. Pediatric dermatology is practiced here, as well.

SLSS's most popular medical dermatology treatments include Mohs micrographic surgery, an advanced treatment procedure for skin cancer that offers the highest potential rate of cure, and full-body skin exams.

“As one in five Americans will develop skin cancer in the course of a lifetime, it is important to receive annual full-body skin exams for early detection of skin cancer,” explained Hlavinka.

In addition to medical dermatology, SLSS also offers various cosmetic procedures, including laser liposuction, cellulite and body contouring treatments, Botox and cosmetic fillers, skin tightening treatments, age- and sun-spot removal, the latest in anti-aging treatments and personalized skin care.

Their most popular cosmetic dermatology treatments include Ultherapy non-invasive skin tightening.

“If you are experiencing drooping skin around your eyes, neck or jaw line but are hesitant to get a traditional facelift, Ultherapy may be a great choice for you,” said Hlavinka.

Another popular treatment is MiraDry sweat relief, which utilizes the only medical device cleared by the FDA to dramatically reduce underarm sweating and provide lasting results.

“With more than one hundred different laser and laser-like devices for both medical and cosmetic procedures, Skin Laser & Surgery Specialists of New York and New Jersey is the premier practice for all of your skin care needs,” said Hlavinka.
